Scale-Up in Education Sep 19 2022 **Scale-Up in Education, Volume 2: Issues in Practice** explores the challenges of implementing and assessing educational interventions in varied classroom contexts. Included are reflections on the challenges of designing studies for improving the instructional core of schools, guidelines for establishing evidence of interventions' impacts across a wide range of settings, and an assessment of national efforts to bring reform to scale in high-poverty schools.

The Research Writer, Spiral bound Version May 15 2022 THE RESEARCH WRITER helps students transition from writing the research paper to doing research writing, from reporting information to working with ideas. The subtitle--Curiosity, Discovery, Dialogue--signals this shift: this handbook promotes research as a curiosity-driven activity that leads to discoveries that are then shared through various types of dialogue. With this practical and reader-friendly handbook, students will learn the research and writing skills needed for any research project and will be able to apply and transfer these skills to their own disciplines. Students can use THE RESEARCH WRITER to become more intelligent, ethically aware researchers, able not just to avoid plagiarism but to write with credibility while navigating the twenty-first century digital landscape. An Investigation Into the Comparability of Two Tests of English as a Foreign Language Dec 10 2021 This book documents a major study comparing the Cambridge First Certificate in English (FCE) with the Test of English as a Foreign Language (TOEFL) to investigate similarities in test content, candidature and use. While both tests were designed to measure many of the same abilities, they represent radically different approaches to language test development, reflecting deeper differences between educational measurement traditions in the US and UK. The thorough investigation of the fundamental characteristics and operational utility of two of the most widely used English tests for foreign students makes this study a valuable contribution to language testing research. As such, it will be of considerable interest to language testing specialists and examination boards, as well as to academic researchers and graduate students in the field of language assessment more generally.

Proceedings of the Sixth SIAM International Conference on Data Mining Nov 28 2020 The Sixth SIAM International Conference on Data Mining continues the tradition of presenting approaches, tools, and systems for data mining in fields such as science, engineering, industrial processes, healthcare, and medicine. The datasets in these fields are large, complex, and often noisy. Extracting knowledge requires the use of sophisticated, high-performance, and principled analysis techniques and algorithms, based on sound statistical foundations. These techniques in turn require powerful visualization technologies; implementations that must be carefully tuned for performance; software systems that are usable by scientists, engineers, and physicians as well as researchers; and infrastructures that support them.

Scale-up in Education: Issues in practice Aug 18 2022 Scale-Up in Education, Volume 2: Issues in Practice explores the challenges of implementing and assessing educational interventions in varied classroom contexts. Included are reflections on the challenges of designing studies for improving the instructional core of schools, guidelines for establishing evidence of interventions' impacts across a wide range of settings, and an assessment of national efforts to bring reform to scale in high-poverty schools. This volume also includes findings and insights from several federally funded research projects charged with bringing conceptual and analytic rigor to studies of successful scale-up. All of the chapters address the challenges of conducting scientific research in schools and provide insights for obtaining the support of teachers and school administrators. The result is a highly readable volume ideally suited for educators interested in the issues that inform intervention research, researchers concerned with designing practical studies that are methodologically sound, and policymakers engaged in evidence-based school reform.

Eating Rice from Bamboo Roots Jun 23 2020 "This book charts the vicissitudes of a rural community of papermakers in Sichuan. The

process of transforming bamboo into paper involves production-related and social skills, as well as the everyday skills that allowed these papermakers to survive in an era of tumultuous change. The Chinese revolution—understood as a series of interconnected political, social, and technological transformations—was, Jacob Eyferth argues, as much about the redistribution of skill, knowledge, and technical control as it was about the redistribution of land and political power. The larger context for this study is the “rural–urban divide”: the institutional, social, and economic cleavages that separate rural people from urbanites. This book traces the changes in the distribution of knowledge that led to a massive transfer of technical control from villages to cities, from primary producers to managerial elites, and from women to men. It asks how a vision of rural people as unskilled has affected their place in the body politic and contributed to their disenfranchisement. By viewing skill as a contested resource, subject to distribution struggles, it addresses the issue of how revolution, state-making, and marketization have changed rural China."

Examining Information Retrieval and Image Processing Paradigms in Multidisciplinary Contexts May 03 2021 Across numerous industries in modern society, there is a constant need to gather precise and relevant data efficiently and quickly. As such, it is imperative to research new methods and approaches to increase productivity in these areas. Examining Information Retrieval and Image Processing Paradigms in Multidisciplinary Contexts is a key source on the latest advancements in multidisciplinary research methods and applications and examines effective techniques for managing and utilizing information resources. Featuring extensive coverage across a range of relevant perspectives and topics, such as knowledge discovery, spatial indexing, and data mining, this book is ideally designed for researchers, graduate students, academics, and industry professionals seeking ways to optimize knowledge management processes.

Let's Talk about Flex Sep 07 2021 The narrative around flexible working needs flipping. After being able to work flexibly for 14 of her 23 years in education across teaching, school leadership and MAT leadership roles, Emma Turner realised that sadly, she's actually in the minority and has just been kinda lucky. Across the education system, although there is a recent groundswell of support for developing more life friendly, innovative and flexi ways of working, there are still a great deal of misconceptions, biases and

prejudices about flexible working and flexible workers. Through her 'playlist' of educational floor fillers, Emma explores some of the successful ways in which flexible working can be viewed by both employers and employees for staff at all levels, including senior and school leadership. Designed to open up the flexible working conversation, this book outlines what can work, what has worked and what could work. This new way of viewing the flexi narrative from an experienced flex-pert encourages all to revisit our views on flexible working.
