web when i was studying generalized quantifier theory
as part of a formal semantics class a few years ago in
college this came up if i recall correctly the professor
said that there weren't any languages which had a
quantifier that had an identical meaning to both but for
the number 3 i don't think there was any real backing
up of that assertion web deleuze makes two claims
about the other upon which i will focus that the other
expresses a possible world 3 and the related claim that
it is the other structure that ensures individuation
within the perceptual world 4 however getting clear on
the implications of these 1 a notable exception is
