Professional development and leadership with you in mind A good friend once said about Chase Sargent that he's "a very intelligent man, but he sure does tick people off sometimes." Sargent doesn't disagree. He may have made some people mad, but he wishes he had done it more often to get this point across: "Leadership—in all aspects of life—is sorely lacking." The second edition of From Buddy to Boss: Effective Fire Service Leadership reinforces the fact that the fire service is screaming for leaders as men and women discover that leadership is important to their existence and success. Being a firefighter can be tiring and frustrating, but it can be rewarding. It's not only about the job, "but also about raising kids, managing your life, and trying to be a good person, attached to God, country, family, and friends," says the author. Many leaders today are surrounded by external politics, hidden agendas, fiscal constraints, and manipulative people. Consider these factors when navigating your career. Sargent knows from decades of experience that simply reaching the top of the organizational ladder does not make you a good leader. Before he went into teaching this subject, "It became apparent very quickly that the leadership and human resources training being provided was as scarce as water in a desert and that the fire service was thirsty." This new second edition includes must-read topics on leadership lessons from the War in Iraq, knowing death in the fire service, and providing leadership in large-scale disasters. This book will change your life. The year 2002 marked the 100th anniversary of the first installation of air-conditioning. During the past century, it has become a staple of American life; 83% of US homes are now air-conditioned. In this engaging social history, Marsha Ackermann explores how the idea of "cooling" became firmly embedded in the social perceptions and expectations of Americans, transforming our definition of comfort and the way we live, work, and play. While classroom learning is suited for conveying basic information to large numbers of people, Hoag (Engine Research Center, U. of Wisconsin at Madison) argues that continuing education for engineers most often requires small groups of people to rapidly develop proficiencies. He discusses the roles of upper management, direct supervisors, and individual engineers in his proposed model for continuing education in organizations. After outlining the model, he discusses applications related to rotational programs, organizational assessment, and program

evaluation. Spiritual progress and arrogance just poles apart,both are quite antithetical in nature.The great human feelings compassion, love, humility.....have immense power to cleanse our impure minds. Once our heart is large enough with these virtues,we may embrace all in the universe in our fold and we grow spiritually, walking in the righteous path.... and enjoy the bliss,that the God had bestowed upon us." Experiencing stress in our everyday life is only human. Be it altercations with peers, upcoming deadlines or unnerving life events which can't be controlled. There's good stress that motivates us, and there's stress that's unhealthy; it controls our thoughts and feelings, leading to insomnia, heart diseases and even mental health issues. So how do we stop sweating over small things and start living blissfully? Through mind engineering, we can! Stress Management through Mind Engineering takes the readers through the process of mind engineering to help them create a stressless mind. A mind that can bear the force of the external environment by tapping the power within. Read this book to not only win over stress but also eliminate the risk of burnouts, understand the cause of high stress, reflect on one's actions and behaviour and ultimately live a happier, healthier life. Historical novel of New York City's volunteer firemen during the turbulent period of industrialization, immigration, abolitionist movement and Civil War. The volunteer system was under attack by a political/insurance industry clique pushing for a paid fire department equipped with the new steam fire engines, which the volunteers opposed. A story of bravery and courage of men who came from all walks of life and were responsible for saving the city from destruction by dozens of disastrous fires, only to be scorned by politicians and labeled as rowdies by their insurance enemies. An interesting look at New York in this period of change and incudes how the game of baseball originated with the volunteer firemen. The New York volunteers carried their firefighting experience west during the gold rush and were responsible for formation of many fire departments in western states. A must read for firefighting, newspaper, telegraph, insurance, New York City and Philadelphia history buffs. So You Want to Be A Engineer? Is a book for anyone who is or who wants to be an Engineer. The book reveals everything nobody else will tell you about the engineering profession. It shows how to save the reader the agony of on the job trial and error training and will give them a head start in using experienced strategies while dealing with technicians, draftsman, marketing, purchasing and manufacturing personnel, and project managers. It doesn't teach them about engineering: it enlightens them to find their right position. There are The Ten Commandments for an engineer, which sums up in ten steps how to survive in the engineering profession and gives in depth reasons why they work. It is a refreshing new and realistic book that touches on the reality that engineers may succeed, not because of their technical expertise but because of the way they interact with technicians, draftsman, marketing, purchasing and manufacturing personnel, and project managers. Each of these topics will be discussed fully with real life stories and examples. There will be easy steps given on how to handle each issue and how an engineer can ease into the company they choose to work for. The Ten Commandments will make it easy for them to sum up the do's and don'ts to survive in the engineering profession. Robert Stephenson, the leading engineer of the mid-nineteenth century whose substantial public works brought about considerable social change is now the subject of this excellent new biography: Robert Stephenson - The Eminent Engineer. Stephenson's engineering practice was responsible for major railway building programmes in Britain and overseas. He oversaw the building of many bridges, particularly the innovative tubular bridges in North Wales and was influential in the development of England's railway network. Stephenson's engineering practice in Westminster, whose many associates were engaged throughout England, were responsible for substantial railway building programmes during the 'mania' years of the 1840s. By 1850, he was associated with one third of the railway network. His overseas railway involvements included building many miles of line and developing national transport plans. Robert Stephenson - The Eminent Engineer also considers Stephenson's public roles and shows how he was perceived by his contemporaries. Stephenson was a Member of Parliament and Commissioner for the Great Exhibition, was well

respected as an arbitrator, received several British and overseas honours and was President of both the Institutions of Civil and Mechanical Engineering. Raj Gopal Katju, scion of an Allahabad lawyer family is an age-old Chemical Engineer who after graduating from the IIT Kharagpur in 1963. surprisingly finds himself still in the regular service at the age of 70. He has over 45 years of industrial and. consultation experience with Indian Rayon Corporation, Veraval. Camphor & Allied Products Ltd. Bareilly, Gujarat Alkalies & Chemicals Ltd., Baroda and Kumar Organic Products Ltd., Bangalore and Baroda. In between official work he has penned anecdotes, essays and short stories in Hindi and English, many of which have been published in newspapers and magazines. He has also authored 4 books each in the above languages. EXPERIMENTS IN CHEMICAL ENGINEERING IS AN AUTOBIOGRAPHICAL ACCOUNT OF HIS SAILING THROUGH LIFE IN AND OUT OF FACTORIES. This is the proceedings of the selected papers presented at 2011 International Conference on Engineering Education and Management (ICEEM2011) held in Guangzhou, China, during November 18-20, 2011. ICEEM2011 is one of the most important conferences in the field of Engineering Education and Management and is co-organized by Guangzhou University, The University of New South Wales, Zhejiang University and Xi'an Jiaotong University. The conference aims to provide a high-level international forum for scientists, engineers, and students to present their new advances and research results in the field of Engineering Education and Management. This volume comprises 121 papers selected from over 400 papers originally submitted by universities and industrial concerns all over the world. The papers specifically cover the topics of Management Science and Engineering, Engineering Education and Training, Project/Engineering Management, and Other related topics. All of the papers were peer-reviewed by selected experts. The papers have been selected for this volume because of their quality and their relevancy to the topic. This volume will provide readers with a broad overview of the latest advances in the field of Engineering Education and Management. It will also constitute a valuable reference work for researchers in the fields of Engineering Education and Management. This book is the first substantial study in any language of one of revolutionary Russia's most distinguished and controversial engineers - Iurii Vladimirovich Lomonosov (1876-1952). Not only does it provide an outline of his remarkable life and career, it also explores the relationship between science, technology and transport that developed in late tsarist and early Soviet Russia. Lomonosov's importance extends well beyond his scientific and engineering achievements thanks to the rich variety and public prominence of his professional and political activities. His generation - Lenin's generation - was inevitably at the forefront of Russian life from the 1910s to the 1930s, and Lomonosov took his place there as one of the country's best known and ultimately notorious engineers. As well as an innovative engineer who campaigned to enhance the role of science, he played a major role in shaping and administering the Russian railways, and undertook several diplomatic and scientific missions to the West during the early years of the Revolution. Falling from political favour during an assignment in Germany (1923-1927), he achieved notoriety in Russia as a 'non-returner' by apparently declining to return home. Thereby escaping probable arrest and execution, he began a new life abroad (1927-1952) which included a research post at the California Institute of Technology in 1929-1930, collaborative projects with the famous physicist P.L. Kapitsa in Cambridge, a long-time association with the Institution of Mechanical Engineers in London, and work for the British War Office during the Second World War. From Marxist revolutionary to American academic, this study reveals Lomonosov's extraordinary life. Drawing on a wide variety of official Russian sources, as well as Lomonosov's own diaries and memoirs, a vivid portrait of his life is presented, offering a better understanding of how science, technology and politics interacted in early-twentieth-century Russia. This 1982 book draws on primary sources to illuminate the life and achievements of engineer Charles Blacker Vignoles (1793-1875). Have you ever walked into a room and noticed off to the side a gaggle of spellbound listeners surrounding an apparent and compelling storyteller? You observe that inching ever closer the group suddenly erupts into an outburst of raucous laughter and you are left feeling that regretfully you have missed something. Indeed you have missed something if you never experienced the eloquent, compelling and frequently hilarious stories of some of the life experience of my father, Kenneth Lionel

Farquharson, P. Eng., , Commander, RCN (retired), a true officer and gentlemen. Part memoir, part history of a generation the likes of which the world will never again witness. This is my father's story, one man's odyssey. Written amidst the pain of loss of his beloved wife and son and failing health, his memorable stories reflect his strength, intelligence, spirit, and humour that became his enduring legacy.

Barbara (Farquharson) Fry, *Loving Daughter Can Mechanical Engineering and Fashion Designing be on the same page?* Naïve and idealistic, Patrick joins the promising Rajan Industries for hefty paychecks, lucrative perks and aspiring positions. Like for any other fresher from a prestigious engineering college, his training period isn't anything less than a 'honeymoon period'. But actual married life starts only when the honeymoon ends. What awaits next for Patrick counted in the least popular department, a boss with his brain on sabbatical, a jealous senior expert in 'Et tu' moments and inescapable office politics. The threshold of tolerating ugly experiences reaches in only nine months – standard pregnancy period – and what is born after that is Patrick version 2.0: the one who chooses to leave all at once but not in an ideal way this time. What made it happen? A wearisome job, a provoking boss, his paralyzed creativity or just love? The Resignation Letter is a coming of age story of a young engineer toppling from a greased and stained job in an outback town and falling over the lavish hanging robes on Delhi's fashion-street.

The chapters on 'Group Discussion and Body Language' are particularly helpful. Besides, the chapter on

'Communication Theory' has been relevantly and effectively explained keeping in mind the needs of the students. Overall, the book is very accessible by all levels of students. It is a part of recommended reading for my students." - Nandini Mukherjee Course Coordinator, Department of Communicative English, St. Xavier's College, Kolkata "An extremely concise, lucidly written and reader-friendly book, that serves as a handy reference manual for all in-service English language teachers of degree engineering colleges. The B.Tech Communicative English syllabus has been closely followed, with detailed sections on grammar, writing and comprehension. The chapters on vocabulary take an insightful look at etymology, word origins, synonymy and antonymy. Detailed word lists and practice exercises make the section extremely helpful for practicing teachers. The sections on grammar are fairly detailed, offering a thorough analysis of Verbs, Tenses, Voice, Narration, Transformation of Sentences and Error Correction. There are plenty of practice exercises for the teacher to choose from. Reading skills are well discussed and technical writing is given all the importance and predominance it usually occupies in any course on technical communication. The section on report writing is extremely useful as a guide for teachers for teaching students the formatting and writing essentials in documenting reports. There is a section on professional speaking too, which enriches the content of the book. On the whole, the book is of continuing usefulness and relevance in any technical English course and will be used by teachers and students alike for many years to come." - Dr Indrajit Bose Assistant Professor of English, GNIT, Kolkata "Dr. Konar's book acts as a comprehensive guide to the students of professional, technical as well as basic courses to hone their language skills. The language of the book is persuasive, fluid and student-friendly which makes it useful even to the first generation learners of English. The scope of this book extends from word-building to report writing and covers almost all the thrust areas of language training in a nutshell. Hence, it deserves a shelf-space in the library of any institution." - Ayushman Banerjee, Assistant Professor in English, Haldia Government College, Kolkata "This is one of the best books on 'Communication' available in the market. Dr. Nira Konar is a brand by herself whenever English Language Teaching (ELT) comes into discussion. This compact edition discusses in detail the various aspects of language ranging from Vocabulary, Grammar, Syntax to effective communication in business. The book gives a clear reading of LSRW skills such as writing, reading, listening, and public speaking. It further confers different means of effective communication, situational dialogues, body language, and group discussions. The book follows the present MAKAUT curriculum of English for B.Tech 1st year 2nd Semester (HM-HU 201 & HM-HU 291) thoroughly. It not only gives an overview of the Theory syllabus but also provides details of Language Laboratory activities as well. "Communication Skills for Professionals" enables the readers to express themselves clearly and communicate effectively at the workplace. This book not only deals with the rudiments of communication but also gives insights into the body language and provides important tips on how to be successful at interviews and group discussions. Primarily intended for students of engineering and technology, the book will also be useful for Management students and the students of all disciplines who want to acquire the skill in corporate communication and excel in their respective professional areas." - Sohini Datta Assistant Professor, Department of Management, IEM, Sector V, Salt Lake, Kolkata "Easy and in-depth writing on the subject is the aim of this book. The author has put in here the fruits of teaching the students from the wide-ranging and first-hand knowledge of business speaking and writing, and listening in a friendly way. It is enriched with extensive references. On every page of the book the students will see how a simpler style of English is balanced with their need." - Dalia Sen Assistant Professor, Bengal Institute of Technology (Under Techno India Group), Kolkata Management of Self & Performance, the topic centered round with the within power of the Author, focus has been put and emphasis has been given on the psycho-behavioural conflict of his mind pertaining to life in acute poverty and adverse conditions; Consciousness remained with him like a friend during his early childhood days, during his school days, college days and various hazardous work place situations. He did not realise consciousness as a great power, was guiding him by overcoming so many obstacles in his life. Realisation of within power came to him when he studied management. More than knowledge and skill; human behaviour, human values, interest to learn, devotion, dedication and commitment to

duty and service is very important in human resources functions in organisation. The entire book is covered with values learnt from Indian thoughts and culture that found in the Veda, the Gita, the Ramayana and the Mahabharata. Without positive values, a person may be highly qualified, received coveted degrees; in real term he is not educated. The book can be helpful to the students of management, employees and executives in government and private organisations, trainers in training institutes, employers and entrepreneurs. All Students and general public are requested to go through this book and help encouraging the author to continue writing further. "—Journal of the Society of Architectural Historians" Aply tells the story of the New York rail system's most active and visible symbol: the architectural and engineering masterpiece, with its grand public concourse, in the heart of Midtown."—New Scientist This is the most complete career resource guide book for engineers dealing with the non-technical side of engineering.
