That's just the physical side of it. The emotional side? Trying to navigate rescheduling work meetings for last-minute appointments based on baseline data each cycle. Tough conversations with friends, family, and your boss. Deciding when to allow your body a "break" from treatment cycles, even if just to give your health savings account a chance to catch up. Overthinking. Sleepless nights. Worrying that in the end, none of it will work. Trying to find a way to stay sane in the midst of all of it while literally filling your body with hormones.

This book provides a crash course in superfrugal baby care, starting before conception and continuing through the baby's first year. You can make, birth, house, feed, diaper, clothe, entertain, and transport a baby for a mere fraction of what the experts say it all will cost, save thousands of dollars, and have fun at the same time. I wrote this book to be the reference that I wish I'd had before I started having children. It starts with basic financial planning for aspiring parents and straightforward how-to instructions for frugal baby care, and keeps right on going into black-belt frugality topics and some of the more controversial issues of modern parenting. Parenting, Inc. Apr 17 2020 A leading social critic goes inside the billion-dollar baby business to expose the marketing and the myths, helping parents determine what's worth their money—and what's a waste Parenting coaches, ergonomic strollers, music classes, sleep consultants, luxury diaper creams, a never-ending rotation of DVDs that will make a baby smarter, socially adept, and bilingual before age three. Time-strapped, anxious parents hoping to provide the best for their baby are the perfect mark for the "parenting" industry. In *Parenting, Inc.*, Pamela Paul investigates the whirligig of marketing hype, peer pressure, and easy consumerism that spins parents into purchasing overpriced products and raising overprotected, overstimulated, and over-provided-for children. Paul shows how the parenting industry has persuaded parents that they cannot trust their children's health, happiness, and success to themselves. She offers a behind-the-scenes look at the baby business so that any parent can decode the claims—and discover shockingly unuseful products and surprisingly effective services. And she interviews educators, psychologists, and parents to reveal why the best thing for a baby is to break the cycle of self-recrimination and indulgence that feeds into overspending. Paul's book leads the way for every parent who wants to escape the spiral of fear, guilt, competition, and consumption that characterizes modern American parenthood.
