Meet the man and uncover the story behind one of Australia's most recognised brands We all know Jim's. Maybe you just passed a Jim's Mowing trailer on the road; or maybe there's a Jim's Cleaning van parked across the street each Tuesday morning; or maybe your best mate is laughing all the way to the bank after quitting the city and starting his new Jim's Fencing franchise, but do you know the real story behind the Jim's Group and its founder, Jim Penman? Brutally efficient, socially awkward, and a tireless perfectionist, Jim is as complex and fascinating as the Jim's Group. This book is a warts-and-all look at his colourful life that delves deep into how he ignored conventional thinking to turn a few mowing rounds into a corporate juggernaut built on always putting the customer first. Jim's unique approach revolutionised Australia's business landscape, providing thousands of people the opportunity to create and grow their own businesses. Most Australians know very little about the man who created one of the nation's most famous companies. For all of his success, Jim is remarkably unassuming and approachable. In this authorised biography, author Catherine Moolenschot sat down with Jim and over one hundred people who know him — from franchisees and franchisors, to family, friends, and adversaries — to get up close and personal with the surprising story of one of Australia's biggest brands and the man who made it all happen. Jim's Book tells the fascinating story of the man and the business that bears his name. Equal parts biography, history and philosophy, this book takes readers on a journey through one man's remarkable life. In 1875, Isidro, a Tarahumara Indian from the Sierra Madre Mountains of Mexico, arrives in Fort Worth just in time to witness the justified killing of Bender Kilgory, the gang leader of a southwestern outlaw gang of brothers. Clarence Withers does the shooting although Bender shoots first. This over a poker game dispute. Once the brothers find out who killed their brother, they go in search of Clarence for the simple purpose of revenge. Their search will eventually take them to the town of Normal Coincidentally, Isidro is the first to arrive in Normal. He learns to read and write English from his new friend the blacksmith, Gottlieb Hegwer. He passionately engages in his tribe's practice of persistence hunting which requires him to run long distances over broken ground and kill his prey by hand. The people of Normal are at first skeptical and then shocked by this unique practice. The story unfolds with a rich tapestry of characters including sheriff Robert Long, his beautiful daughter Sally, the new deputy sheriff and ex-Union soldier, Dan Cooper and an unsavory traveling poker player, Clarence Withers, a man with a penchant for gunfights. Then here comes the Kilgory gang. How these people interact with Isidro and with each other provides an authentic historical perspective on the questions of race, sexuality, and killing in the old west. "An intimate correspondence between Sister Wendy Beckett, an English hermit and famous "art nun" and Robert Ellsberg, an American Catholic writer and publisher about faith, holiness, suffering, and happiness"-- "In graphic novel format, follow Max Axiom as he explains how cell phones work"--Provided by publisher. The book describes how Lisa Meitner, of Jewish heritage, found herself working as a physicist at the Kaiser Wilhelm Institute in Berlin when the Nazis came to power in 1933; how she was

hounded out of the country and forced to relocate to Sweden; how German chemists Otto Hahn and Fritz Strassman continued with the project – on the effect of bombarding uranium (the heaviest known element at the time) with neutrons, a project which Lise herself had initiated, being the intellectual leader of the group. It describes how Hahn and Strassmann, with whom she kept in touch, came up with some extraordinary results which they were at a loss to explain; how Lise, and her nephew Otto Frisch, who was also a physicist, confirmed what they had achieved - the ‘splitting of the atom’, no less, and provided them with a theoretical explanation for it. This laid the foundation for nuclear power, medical-scanning technology, radiotherapy, electronics, and of course, the atomic bomb - the creation of which filled Lise with horror. It describes the crucial part that Lise played in our understanding of the world of atoms, and how deliberate and strenuous attempts were made to deny her contribution; to belittle her achievements, and to write her out of the history books, even though Albert Einstein said she was even ‘more talented than Marie Curie herself’. The author is fortunate and honoured to have been granted several interviews with Lise’s nephew Philip Meitner – himself a refugee from the Nazis - who with his wife Anne, provided much valuable information and many photographs. Most of us are unaware of how much we depend on quantum mechanics on a day-to-day basis. An “engaging and enlightening” (The Wall Street Journal) argument that innovation and progress are often achieved by revisiting and retooling ideas from the past rather than starting from scratch—from Guardian columnist and contributor to The Atlantic, Stephen Poole. Innovation is not always as innovative as it may seem. *Rethink* is the story of how old ideas that were mocked or ignored for centuries are now storming back to the cutting edge of science and technology, informing the way we lead our lives. This is the story of Lamarck and the modern-day epigeneticist whose research vindicated his mocked two hundred-year-old theory of evolution; of the return of cavalry use in the war in Afghanistan; of Tesla’s bringing back the electric car; and of the cognitive scientists who made breakthroughs by turning to ancient Greek philosophy. “An anecdote-rich tour through the centuries” (The New York Times), with examples from business to philosophy to science, *Rethink* shows what we can learn by revisiting old, discarded ideas and considering them from a novel perspective. From within all these rich anecdotes of overlooked ideas come good ones, helping us find new ways to think about ideas in our own time—including out-of-the-box proposals in the boardroom to grand projects for social and political change. “Clever and entertaining...a thoughtful and thought-provoking book” (The Sunday Times, London), *Rethink* helps you see the world differently. Armed with this picture of the surprising evolution of ideas and their triumphant second lives, and in the bestselling tradition of Malcolm Gladwell, Poole’s new approach to a familiar topic is fun, convincing, and

brilliant—and offers a clear takeaway: if you want to affect the future, start by taking a look at the past. Important American periodical dating back to 1850. \*\*\*Finalist for the Gilder Lehrman Lincoln Prize\*\*\* Henry Louis Gates, Jr: "A stunning tale of a little-known figure in history." Candice Millard: "Be Free or Die makes you want to stand up and cheer." The astonishing true story of Robert Smalls' amazing journey from slave to Union hero and ultimately United States Congressman. It was a mild May morning in Charleston, South Carolina, in 1862, the second year of the Civil War, when a twenty-three-year-old slave named Robert Smalls did the unthinkable and boldly seized a Confederate steamer. With his wife and two young children hidden on board, Smalls and a small crew ran a gauntlet of heavily armed fortifications in Charleston Harbor and delivered the valuable vessel and the massive guns it carried to nearby Union forces. To be unsuccessful was a death sentence for all. Smalls' courageous and ingenious act freed him and his family from slavery and immediately made him a Union hero while simultaneously challenging much of the country's view of what African Americans were willing to do to gain their freedom. After his escape, Smalls served in numerous naval campaigns off Charleston as a civilian boat pilot and eventually became the first black captain of an Army ship. In a particularly poignant moment Smalls even bought the home that he and his mother had once served in as house slaves. Cate Lineberry's Be Free or Die is a compelling narrative that illuminates Robert Smalls' amazing journey from slave to Union hero and ultimately United States Congressman. This captivating tale of a valuable figure in American history gives fascinating insight into the country's first efforts to help newly freed slaves while also illustrating the many struggles and achievements of African Americans during the Civil War. An old friend who lives in the forest reserves knew him when he was a little feller was his last hope to borrow a cup of sugar. On Thanksgiving Day, he goes to the old man's house and learns there is a surprise waiting for him when he arrives. In the first history of American Catholic feminism, Henold explores the movement from the 1960s through the early 1980s, showing that although Catholic feminists had much in common with their sisters in the larger American feminist movement, Catholic feminism was distinct and had not been simply imported from outside. Henold demonstrates that efforts to reconcile faith and feminism reveal both the complex nature of feminist consciousness and the creative potential of religious feminism. It began in Boston, with angry colonists objecting to the tyranny of a king who ruled from an ocean away. It was voiced by patriots such as Sam Adams and Patrick Henry and echoed by citizens from New England all the way to the Carolinas. It was fought by many - colonists and patriots, Loyalists and slaves, Frontiersmen and Indians, British and French soldiers. Over more than ten years, sides were taken, guns drawn, lives lost. But through it all, one man - a general from Virginia named George Washington - held the young colonies together and led them to victory, beating almost impossible odds. History lovers Betsy and Giulio Maestro tell this true story of extraordinary times, incredible drama, and the birth of a new nation. Reframing feminism for the twenty-first century, this bold and essential history stands up against "bland corporate manifestos" (Sarah Leonard). Eschewing the conventional wisdom that places the origins of the American women's movement in the nostalgic glow of the late 1960s, *Feminism Unfinished* traces the beginnings of this seminal American social movement to the 1920s, in the process creating an expanded, historical narrative that dramatically rewrites a century of American women's history. Also challenging the contemporary "lean-in," trickle-down feminist philosophy and asserting that women's histories

all too often depoliticize politics, labor issues, and divergent economic circumstances, Dorothy Sue Cobble, Linda Gordon, and Astrid Henry demonstrate that the post-Suffrage women's movement focused on exploitation of women in the workplace as well as on inherent sexual rights. The authors carefully revise our "wave" vision of feminism, which previously suggested that there were clear breaks and sharp divisions within these media-driven "waves." Showing how history books have obscured the notable activism by working-class and minority women in the past, *Feminism Unfinished* provides a much-needed corrective. This booklet offers an unique presentation of the unfolding of our universe. It interweaves the insights of contemporary science with Christian faith, and reveals the divine orchestration of the Creation Story in a dramatic, fresh and appealing way. Robert Petterson--popular speaker, storyteller, and author--has been a student for his entire life of what God is teaching us through those real-life U-turns. In this short book, he compiles amazing stories that teach lessons you won't easily forget. Each entry is written in the rest-of-the-story style popularized by Paul Harvey"--Amazon.com *Who was Alexander Glasberg?* A Jewish emigre from the former Russian empire who settled in France in 1932 and became a Catholic priest. A Yiddish-speaking polyglot. A man of astonishing audacity who saved many Jews during the German occupation. After narrowly escaping from the clutches of the Gestapo in Lyon in 1942, he appeared under an assumed name as a parish priest in south-west France, where he joined the local Resistance. After the Liberation he moved to Paris and set up an entirely secular organisation, COS, to help people to find their feet in France after the traumas of the war. It provided a unique combination of services for asylum-seekers, for the elderly and for the disabled. Forty years after the death of the founder in 1981, the COS Alexander Glasberg Foundation is much bigger but remains strikingly faithful to the ideals which inspired its beginnings. Abbe Glasberg was a free spirit who evaded all conventional boxes. A priest outside the Church. An ardent Francophile yet passionate defender of refugees. A Zionist yet strong supporter of the Palestinian people. A sociable yet also secretive figure. This book traces key moments in his remarkable life and sheds light on a mesmerising personality. Imagine being told to leave your home... Imagine American soldiers occupying your house and land... Imagine being 12 and angry, with only a cat to tell your secrets to... Well it all happened (most of it anyway) in

Slapton Sands, Devon, in 1944. Based on Michael Morpurgo's The Amazing Story of Adolphus Tips, this play explodes everything we thought we knew about the D-Day landings. With signature Knee-high sorcery, 946 uses music, puppetry and foolishness to tell this tale of war, prejudice and love. Tender, political and surprisingly romantic, this story speaks to us all and will finally reveal the secrets the US and British governments tried to keep quiet.
