**Advances in Cryptology - EUROCRYPT '94** Mar 16 2022 This volume is concerned with the individual steps in the pathway of retrovirus morphogenesis and maturation starting at the point where the components of the virion have been synthesized within the infected cell and ending once the infectious virion has been released from this cell. An introductory chapter provides a comparative description of the structure and morphology of infectious viruses. A novel feature is the organization according to individual steps in the pathway of virus particle formation rather than according to individual viruses or virus groups as has been done in most previous reviews. **Public Epistemic Authority** Jan 22 2020 Inter- and supranational courts derive their legitimacy partly from an institutional comparison: judges' legal expertise and the quality of judicial procedures justify a court's claim to authority towards other branches of government and other courts with overlapping jurisdiction. To provide a benchmark for assessing judicial outcomes that is compatible with democratic commitments, Johann Laux suggests a new normative category, Public Epistemic Authority (PEA). It builds on the mechanisms behind theories of collective intelligence and empirical research on judicial decision-making. PEA tracks judges' collective ability to reliably identify breaches of law. It focuses on cognitive tasks in adjudication. The author applies PEA to the Court of Justice of the European Union and offers suggestions for improving its institutional design.
