Author has worked on a wide range of publications, has taught publication production and now owns a book publishing business. This proceedings volume presents the latest research from the worldwide mass customization & personalization (MCP) community bringing together new thoughts and results from various disciplines within the field. The chapters are based on papers from the MCPC 2017. The book showcases research and practice from authors that see MCP as an opportunity to extend or even revolutionize current business models. The current trends of Industrie 4.0, digital manufacturing, and the rise of smart products allow for a fresh perspective on MCP: Customization 4.0. The book places a new set of values in the centre of the debate: a world with finite resources, global population growth, and exacerbating climate change needs smart thinking to engage the most effective capabilities and resources. It discusses how Customization 4.0 fosters sustainable development and creates shared value for companies, customers, consumers, and the society as a whole. The chapters of this book are contributed by a wide range of specialists, offering cutting-edge research, as well as insightful advances in industrial practice in key areas. The MCPC 2017 has a strong focus on real life MCP applications, and this proceedings volume reflects this. MCP strategies aim to profit from the fact that people are different. Their objective is to turn customer heterogeneities into opportunities, hence addressing "long tail" business models. The objective of MCP is to provide goods and services that best serve individual customers' needs with near mass production efficiency. This proceedings volume highlights the interdisciplinary work of thought leaders, technology developers, and researchers with corporate entrepreneurs putting these strategies into practice. Fuses design fundamentals and software training into one cohesive book! Teaches art and design principles with references to contemporary digital art alongside basic digital tools in Adobe's Creative Cloud Addresses the growing trend of compressing design fundamentals and design software into the same course in universities and design trade schools. Lessons

are timed to be used in 50 to 90 minute class sessions with additional materials available online Free video screencasts demonstrate key concepts in every chapter All students of digital design and production—whether learning in a classroom or on their own—need to understand the basic principles of design. These principles are often excluded from books that teach software. Foundations of Digital Art and Design reinvigorates software training by integrating design exercises into tutorials fusing design fundamentals and core Adobe Creative Cloud skills. The result is a comprehensive design learning experience. This book is organized into six sections that focus on vector art, photography, image manipulation, typography, web design, and effective habits. Design topics and principles include: Bits, Dots, Lines, Shapes, Rule of Thirds, Zone System, Color Models, Collage, Appropriation, Gestalt, The Bauhaus Basic Course Approach, The Grid, Remix, Automation, and Revision. This book, together with the accompanying computer program Dynamics 2 (included on a diskette), is suitable for the novice and the expert in dynamical systems. It helps the novice begin immediately exploring dynamical systems with a broad array of interactive techniques. The book explains basic ideas of nonlinear dynamical systems, and Dynamics 2 provides many tools developed by the Maryland Chaos group to visualize dynamical systems. Dynamics 2 can be used by undergraduates, by graduate students, and by researchers in a variety of scientific disciplines.
